INSTRUCTIONS TO MARKERS

1. Markers are required to work out the question paper before the marking guideline is discussed.

2. Accuracy is marked with a red/and manipulation is marked with a blue X or ✓**.** This is to ensure that students are rewarded for tasks done well, e.g. if the accuracy counts 5 marks, but the candidate made 10 accuracy errors, he/she only loses 5 marks for accuracy and is still rewarded for the manipulation that was done correctly.

3. To aid with the marking process we suggest that a transparency template is made of the breakup of marks at the beginning of the marking guideline for each question. Use this template to ensure that all markings are made at the same place on the printout. This will also aid with the moderation process. Accuracy is marked negatively with a red /. The marker writes the corresponding number in blue (manipulation) and makes a tick (correct) or X (error) next to the number.

4. All irregularities are marked and marks are transferred to the cover page. The word IRREGULARITY is written next to the percentage and an irregularity report is completed.

5. The marks achieved for each question is written on the printout of each question in the following table format:

	A	M	T
Write the total possible mark on this line –			
Write the candidate's errors on this line -			
Write the candidate's mark achieved on this line –			

6. The student's total mark is written on the cover of the EXAMINATION FOLDER next to the corresponding QUESTION NUMBER.

7. If a student handed in a printout but achieved 0 for the question, then 0 (zero) is written on the COVER next to the corresponding QUESTION NUMBER.

8. If a student did not hand in a printout a line is drawn across the block next to the corresponding question number.

Copyright reserved

9. All printouts must have the candidate's EXAMINATION NUMBER AND/OR A WATERMARK. If a student handed in a printout without an EXAMINATION NUMBER AND/OR A WATERMARK, the question MUST BE MARKED and reported as an IRREGULARITY.

10. All irregularities are marked and marks are transferred to the COVER PAGE. The word IRREGULARITY (IRR) is written next to the percentage and an irregularity report is completed.

11. Only mark what the marking guideline indicates and DO NOT penalise students for automatic format or styles used for example in MS Office 2007.

Editor's corner: Is it really worth risking it all?

Statistics reveal that South Africa is among the countries with the largest HIV pandemic in the world. It is estimated that more than 6 million South Africans are with HIV. It was further found that becoming sexually active at an early age increases the lifetime risk of getting HIV. This is mainly because young people are more likely to engage in high risk behaviours such as alcohol and drug use, unprotected sex and having multiple sex partners.

One has noted with great concern that having multiple sexual partners seems to be the most popular thing in our college. However, the above statistics MUST make us re-evaluate our behavioural patterns as young people as risky sexual behavior can be detrimental. Our academic careers and social lives are placed at risk in this regard.

CHOOSE WISELY, YOU ONLY HAVE ONE LIFE. THE FUTURE IS OURS
