INSTRUCTIONS TO MARKERS

1. Markers are required to work out the question paper before the marking guideline is discussed.

2. **Accuracy errors** are marked with a **red /.** Accuracy errors refer to spelling errors and omission of text/numbers. The mark allocated for accuracy indicates the maximum marks that can be deducted for accuracy errors. For example, if FIVE marks are allocated for accuracy, a candidate will only lose a maximum of FIVE marks for accuracy, even if the number of accuracy errors exceeds five in that specific question.

3. **Manipulation errors** are marked with a **blue x** next to the corresponding manipulation number. Manipulation marks that are awarded for correct answers are indicated with a **blue** ✓ next to the corresponding manipulation number. For example, if TEN marks are allocated for manipulation, then numbers 1–10 must be written next to the **blue x or** ✓ in the same position indicated on the marking guideline.

4. The marks achieved for each question is written on bottom right of the PRINTOUT for each question in the following table format:

	A	M	T
Write the total possible mark in this space			
Write the no. of errors in this space			
Write the mark achieved in this space and circle the total mark			◯

5. The candidate's total mark per question is transferred to the cover of the examination folder next to the corresponding question number.

6. If a candidate handed in a printout, but achieved ZERO for the question, then 0 (ZERO) is written on the cover next to the corresponding question number.

7. If a candidate did not hand in a printout a line is drawn through the block next to the corresponding question number.

8. If a candidate handed in duplicate printouts of the question (without striking it out/cancelling it), mark the question that would benefit the candidate and draw a line across the extra printouts with the notation 'Duplicate'.

9. If a candidate handed in a printout without an EXAMINATION NUMBER and a consistent WATERMARK, the printout must be marked and reported as an irregularity. Both the EXAMINATION NUMBER and a CONSISTENT WATERMARK is required to ensure authenticity as per examination instructions.

Copyright reserved

10. If a candidate did not produce a printout for Question 2 (i.e. completed the merge process before/without printing the primary document) mark as follows:

    - Mark the first printout of Question 3 as Question 2 but penalise for merge fields not inserted. Indicate on the top of the printout that this printout was marked as Question 2.

    - Mark the second printout/letter of Question 3 as Question 3. The candidate must be awarded marks for all correct work in Question 3 (including merged information on the 1st letter) to avoid the candidate being double penalised for the insertion of merge fields.

11. If a candidate used the incorrect programme to answer a question, for example MS Word instead of MS Access for Question 9, marks must be awarded for accuracy (as well as uppercase/lowercase and letter spacing) but penalised for manipulation. **The candidate will lose all manipulation marks** that are program specific, as this assesses the candidates' ability to use the specified program i.e. MS Word (Question 1-3), MS Excel (Question 4-7) and MS Access (Question 8-10).

12. If a candidate produced an incorrect printout (for example a print screen image of Question 8) marks must be awarded for accuracy and any manipulation which can be assessed from the given printout. The candidate will lose marks for the printout and any other manipulation instruction which is incorrect and cannot be assessed from the printout.

13. If a candidate does not use the specified font style, the candidate must be penalised UNLESS the scripts are accompanied by a report indicating that the required font style was not available on the MS Office version used at that examination centre OR it is establish by the marking team that the version indicated on the cover of the examination folder does not provide for the specified font.

14. If an IRREGULARITY is detected during the marking process the script must be marked and the IRREGULARTY is recorded on the cover page of the script and on the mark sheet as per national examination instructions. An irregularity report must be completed.

SECTION A

QUESTION 1

ACCURACY	MANIPULATION	TOTAL
8	12	20

QUESTION NUMBER	MARKS	ACCURACY
1.5	8	**Penalise ALL spelling errors and omissions** (deduct ONE mark for every missing word) in the document up to a maximum of 8 marks. NOTE: Repeated errors must be penalised once only. Incorrect letter spacing, line spacing, upper case and lower case are penalised as manipulation errors.

QUESTION NUMBER	MARKS	MANIPULATION
1.1	1✓	MS Word or MS Access – Data source (Penalise if the document was keyed in as a MS Word table, instead of a data source document)
1.2	2✓	Arial, size 12 (both must be correct)
1.3	3✓	MS Word: Header inserted MS Access: Table renamed (Accept with or without the comma)
1.3	4✓	MS Word: EXAMINATION NUMBER, QUESTION 1 centred MS Access: EXAMINATION NUMBER, QUESTION 1 used as table name
1.4	5✓	Field names – Upper case
1.4	6✓	Field names - right-aligned
1.5	7✓	Upper case/Lower case correct
1.5	8✓	Letter spacing correct
1.6	9✓	Landscape
1.7	10✓	Column width adjusted - All text visible
1.7	11✓	Column width adjusted –Data for each record is displayed on one line
1.9	12✓	Print data source on ONE A4 page landscape (Penalise if the document was not created as a data source document)
