QUESTION 1

1.1	1.1.1	B
	1.1.2	C
	1.1.3	B
	1.1.4	A
	1.1.5	D
	1.1.6	C
	1.1.7	B
	1.1.8	C
	1.1.9	B
	1.1.10	A
	1.1.11	B
	1.1.12	A
	1.1.13	D
	1.1.14	C
	1.1.15	C

(15 × 1) (15)

1.2	1.2.1	E
	1.2.2	J
	1.2.3	C
	1.2.4	F
	1.2.5	L
	1.2.6	K
	1.2.7	A
	1.2.8	G
	1.2.9	B
	1.2.10	I

(10 × 1) (10)

1.3	1.3.1	False
	1.3.2	True
	1.3.3	True
	1.3.4	True
	1.3.5	True
	1.3.6	False
	1.3.7	False
	1.3.8	True
	1.3.9	True
	1.3.10	False
	1.3.11	False
	1.3.12	False
	1.3.13	True
	1.3.14	False
	1.3.15	True

TOTAL SECTION A: 50

SECTION B

QUESTION 2

2.1 2.1.1 RGB is an additive colour system✓ that works with light.✓ RGB stands for red, green and blue light that are mixed together by a computer screen in various ways to produce a broad range of colours until you get white.✓ RGB system is for digital screens such as computers, tablets, cell phones, etc. Digital output.✓

2.1.2 CMYK is a subtractive system✓ that works with ink, dyes or paint.✓ CMYK stands for cyan, magenta, yellow and black.✓ CMYK works with a digital✓ printer. Print output.✓

(2 × 2) (4)

2.2 Warm colours should be used for the foreground✓ and faded cool colours for the background.✓ The warm colours seem closer than the cool colors.✓ Vivid colours are more dominant than subtle colours.✓ (2)

2.3 Serif typeface has small extra lines/tails at the beginning and/or end of the characters.✓ Sans serif means characters are without the tails.✓ (2)

2.4 Rhythm refers to the recurrence of design elements within a layout.✓ Rhythm can create an illusion of movement✓ and is used to establish pattern and texture.✓ (2)

2.5 Once a symbol is registered it will appear in the library,✓ which means it can be re-used.✓ Duplication of a symbol saves time✓ e.g. one wheel of a vehicle could be copied.✓ (3)

2.6 Key frames or key drawings are the first step in animation✓ as it sets the beginning and end points of a movement.✓ This makes it easier for the animator as it is easy to see the most important moments of the action.✓ It also helps to control the timing of the movement.✓ (2)

2.7 Tweening is when the animation software automatically✓ inserts frames between the key frames✓ in order to create a smoother illusion of movement in the animation. (2)

2.8
- Motion-tween
- Classic-tween
- Shape-tween (3)

2.9
- It is easy to share.
- It is easy to store.
- It is quality does not decrease when it is copied.
- It is easy to copy.
- It is inexpensive to copy.
- It can be broadcasted to multiple users at the same time. (Any 3 × 1) (3)

2.10 The data of the video is continuously being sent over the internet✓ to a remote user without being downloaded✓ on a computer or device. (2)
[25]

QUESTION 3

3.1 The scanning process was divided into two halves.✓ Odd-numbered lines were scanned first and even-numbered lines second.✓ The combination of the two images created a complete picture.✓ It is also known as interlaced or interleaved scanning.✓ (3)

3.2 Unnecessary data is thrown away✓ in order to reduce the file size.✓ Less hard drive space is needed.✓ (2)

3.3.1 Raw video runs at 25 frames per second. The speed of the video could be cut✓ to 15 frames without losing quality.✓

3.3.2 Image size could be decreased✓ to reduce the file size but aspect ratio should be retained in order not to lose quality.✓

3.3.3 Normal digital video contains 24-bit colour, which means the image consist of millions of colours.✓ The colour range could be decreased✓ to 16-bit to reduce the file-size and still be good quality.✓

(3 × 2) (6)

3.4
- AVI
- FLA
- MP4
- AVCHD
- WMV
- MOV (Any other 4 × 1) (4)

3.5 It is the storage of multimedia information✓ in a format✓ that could be accessed, retrieved and interpreted✓ by a digital device✓ such as a computer, tablet or smartphone e.g. e-books, digital magazines, digital libraries, etc.✓ (4)

3.6
- Camera
- Video camera
- Recording studio (Any other correct answers) (2)

3.7
- PC
- Tablet
- Notebook
- Laptop
- Smartphone
- iPad
- iPod
- MP3 player
- Smart TV
- TV and DVD/blu-ray player combination
- Portable DVD player

or any other multimedia device (Any other correct answers) (2)

3.8
- .doc
- .rtf
- .docx
- .txt
- .odt

Also accept:
- .pdf
- .html
- .epub
- .mobi
- .lit
- .djvu/.djv (Any other correct answers) (2)

[25]

QUESTION 4

4.1 4.1.1 A master page is a template✓ on which all the pages of a brochure are based.✓ (2)

4.1.2
- It saves time✓ as any change made to the master page will affect all the other pages of the brochure.✓
- The master page can be used for the setup of the brochure.✓ (2)

4.1.3
- Page numbers
- Header/footer
- Graphic/design elements
- Page size
- Colours
- Font
- Styling
- Margins
- Bleed (4)

4.2
- It is used when graphics are placed within text.✓
- Text wrapping could be set to let text wrap around the graphic in different ways.✓
- E.g. the size of the space between the graphic and the text could be adjusted.✓ (2)

4.3
- Casting director
- Costume designer
- Director
- Location manager
- Make-up artist
- Production designer
- Researcher
- Set designer
- Television producer
- Writer
- Head writer
- Screenwriter
- Story editor (Any 5 × 1) (5)

4.4 4.4.1
- Adobe Audition
- Audacity
- Logic Pro X
- Reaper
- FL Studio
- Presonus Studio One (Any other correct answers)

4.4.2
- GIMP
- Adobe Photoshop
- CoralDraw
- Pizap
- Microsoft Publisher
- Picasa (Any other correct answers)

4.4.3
- Adobe Premiere Pro CC
- Apple Final Cut Pro X
- CyberLink PowerDirector
- HitFilm Pro
- Adobe Premiere Elements
- Lightworks
- Hitfilm Express
- DaVinci Resolve (Any other correct answers)

(3 × 2) (6)

4.5 4.5.1
- wav
- mp3
- ogg
- raw
- msv
- dvf
- mid (Any other correct answers)

4.5.2
- TIFF
- JPEG
- JPG
- GIF
- PNG
- Raw image files (Any other correct answers)

(2 × 2) (4)

[25]

QUESTION 5

5.1 The multimedia production team should have a planning meeting to discuss the following during pre-production:

- Present the problem (the multimedia project).
- Decide on strategies to solve the problem.
- Determine the full requirement of the project.
- Consider the client's needs, technical requirements and audience preferences.
- Understand what needs to be done.
- Conceptualise – idea generation, brainstorming, coming up with ideas, thinking of how this project can be done.
- Ideas are listed, evaluated and narrowed down.
- Consider available resources.
- Decide what can realistically be done to bring the project to life.

Also part of the pre-production phase:

- Script writing, Research, Action planning, Story boarding, Flow-chart Designing, Editing (6)

5.2

- The actions✓ that will take place
- Who✓ will carry out these actions
- A time-schedule✓ that shows when these actions will take place and when will it be completed/duty roster/time planning
- What resources✓ are needed to carry out these actions (budget, staff, equipment, etc.)
- Communication (who should know what)

Also accept:

- Capturing content, Editing content, Creating content, Reviewing content (4)

5.3

- It shows the sequence✓ of a video visually.
- It saves time.
- It helps to visualise the entire video from start to finish.
- It helps to plan the sequence of the video.
- It helps to think through all the logistics of the project.
- It shows the flow of the project.
- It helps with continuity.
- It could contain rough sketches/thumbnail sketches.
- It could be used to show the mood of each shot.

Other elements that could be included:

- Types of camera shots,✓ Still images,✓ Music,✓ Transitions✓ Titles,✓ Props,✓ Costumes,✓ Lighting,✓ Sound effects✓ (4)

5.4 A user-interface is the front-end✓ of a computer programme.✓ It is the 'display'✓ for the user that reflects on a screen✓ e.g. computer, smartphone, tablet, ATM. It gives the user instructions and guides him or her through steps to follow✓ e.g. do you want to withdraw/deposit money, enter your PIN, enter the amount, do you want to do another transaction?✓ (4)

5.5
- Compiling
- Re-editing
- Finishing
- Printing
- Publishing
- Programming
- Delivering (3)

5.6 5.6.1 Objects that are used on stage, studio✓ or on screen. These objects are portable or movable✓ e.g. a background, chair, guitar, costume, etc.✓

5.6.2 Sound effects are achieved through the manipulation of equipment and software tools✓ e.g. echo,✓ reverb, etc. or by capturing real-world sounds e.g. footsteps, crowds, traffic, etc.✓

(2 × 2) (4)
