SECTION A

QUESTION 1

1.1 Various options are given as possible answers to the following questions. Choose the answer and write only the letter (A–D) next to the question number (1.1.1–1.1.15) in the ANSWER BOOK.

1.1.1 The index of a book is usually at the …

A front of a book.
B back of a book.
C end of each chapter.
D bottom of each page.

1.1.2 Wikipedia is a…

A dictionary.
B movie.
C digital encyclopedia.
D reference book.

1.1.3 A prototype is …

A the final product.
B a sample product.
C the planning of a product.
D the production of a product.

1.1.4 The shape in a flowchart that indicates a decision is a …

A diamond.
B circle.
C rectangle.
D oval.

1.1.5 The term *monochromatic* refers to …

A a colour gradient.
B different colours.
C rainbow colours.
D one colour.

1.1.6 Adobe InDesign software is most suitable for …

A illustrations.
B editing images.
C doing the layout of a book.
D creating a blog.

1.1.7 This layer allows the animator to show or hide elements on the underlying layers.

A Normal layer
B Mask layer
C Shape layer
D Custom layer

1.1.8 A video of a man leaving his house, getting into his car, arriving at work and sitting in his office is using the principle of …

A cause and effect.
B random editing.
C clear continuity.
D sepia editing.

1.1.9 To add a sound clip to a video in Premier Pro, the sound clip is dragged from the source monitor to the …

A bin.
B timeline.
C video codec.
D project panel.

1.1.10 The masthead is the … of a magazine.

A title
B table of contents
C front cover
D last page

1.1.11 An advantage of storyboarding is that …

A it creates more work.
B it saves time.
C it's nice to have it.
D viewers need it.

1.1.12 When you are drawing a flowchart in multimedia, …

A there are no fixed rules on how to draw a flowchart.
B only draw it at the end of your project.
C remember that flowcharts are difficult to follow.
D you need outside help to draw them.

1.1.13 A prototype can be defined as …

A an improved version of the original.
B a non-working replica of the original.
C a dummy from which the original will be made.
D a first example of something, from which all later forms are developed.

1.1.14 A movie still can be defined as a …

A distraction to movie production.
B stunt in a movie which cannot be performed by actors.
C photograph taken on or off the set of a movie or television program during production.
D photo of the main character in a movie.

1.1.15 The following is not an example of video transition in video editing:

A Dissolve
B Fade-in
C Bright up
D Swipe

(15 × 1) (15)

1.2 Choose a/an word/item from COLUMN A that matches a/an word/item in COLUMN B. Write only the letter (A–L) next to the question number (1.2.1–1.2.10) in the ANSWER BOOK.

COLUMN A		COLUMN B	
1.2.1	Graphic content	A	packaging of file
1.2.2	Adobe Premier Pro	B	printing of poster
1.2.3	Setting up of a document	C	select template
1.2.4	Adobe photoshop	D	interactivity
1.2.5	MS Word	E	adobe illustrator
1.2.6	Content production	F	.jpg
1.2.7	File preparation	G	uploading of website
1.2.8	Publishing	H	.pdf
1.2.9	Digital delivery	I	audacity
1.2.10	Sound content	J	.avi
		K	acquire content
		L	write letters

(10 × 1) (10)

1.3 Indicate whether the following statements are TRUE or FALSE. Choose the answer and write only 'True' or 'False' next to the question number (1.3.1–1.3.15) in the ANSWER BOOK.

1.3.1 Creativity only comes by training.

1.3.2 A photograph is an example of a still image.

1.3.3 Storyboards are used to indicate which characters are in a scene and what they say and do, but *sound* is never indicated in a storyboard.

1.3.4 A reference is a string of text that connects one section of a book to another.

1.3.5 A subwoofer is a loudspeaker that is designed to reproduce very low bass frequencies.

1.3.6 A mono audio track contains two channels (left and right).

1.3.7 In a video, titles that move vertically are called crawls.

1.3.8 Analogue video from a live analogue camera source should be digitised before it can be used for HDTV-broadcasting.

1.3.9 External content could be loaded and played by making use of ActionScript.

1.3.10 Bitmap images are unsuitable for animations.

1.3.11 It is very difficult to reuse a symbol element in animation.

1.3.12 Leading refers to the vertical, horizontal and adjacent space between text.

1.3.13 It is possible to create a calendar using tables.

1.3.14 You cannot insert images or pictures in a program like InDesign.

1.3.15 The references in InDesign automatically update when the content is moved around.

1.4 Give ONE word (or a term) for each of the following descriptions. Write only the word or a short term next to the question number (1.4.1–1.4.10) in the ANSWER BOOK.

1.4.1 Buttons such as *Home, Next, Back* and *Exit* on a webpage

1.4.2 When creating a book, all the chapters of the book are saved as separate documents and added to this file

1.4.3 Use this tool to trim an audio track and move the preceding or subsequent audio track to fill the empty space

1.4.4 Randomly generated text that fills a text space during the design phase

1.4.5 The properties of an object

1.4.6 The space around the main elements of or objects in a design

1.4.7 A type of layout where the designer determines fixed positions for all the design elements

1.4.8 The term used for increasing or decreasing the space between letters in a text

1.4.9 Quick, rough drawings that a designer makes to visualise an idea

1.4.10 Colours that are next to each other on the colour wheel

(10 × 1) (10)
[50]

TOTAL SECTION A: 50

SECTION B

QUESTION 2

2.1 Briefly explain how the following digital colouring systems are used in multimedia:

2.1.1 RGB

2.1.2 CMYK

(2 × 2) (4)

2.2 Explain how warm and cool colours could be used in a design in order to create the perspective of depth. (2)

2.3 Highlight difference between *serif* and *sans serif* typefaces. (2)

2.4 How would you apply the principle of rhythm in your designs? (2)

2.5 Explain the importance of registering a symbol in animation. (3)

2.6 Discuss the use of key frames in frame animation. (2)

2.7 Define the term *tweening* in animation. (2)

2.8 Name THREE types of tweening. (3 × 1) (3)

2.9 State THREE advantages of digital video over analogue. (3 × 1) (3)

2.10 Describe *video streaming*. (2)

[25]

QUESTION 3

3.1 Explain the interlaced scanning method and how it was used in analogue television screens. (3)

3.2 Discuss the effects of lossy video compression. (2)

3.3 Explain how the following factors could be adjusted during the compression of a video signal:

3.3.1 Frame rate

3.3.2 Image size

3.3.3 Colour depth

(3 × 2) (6)

3.4 Name FOUR common video file formats. (4 × 1) (4)

3.5 Define *electronic publishing*. (4)

3.6 Name TWO examples of input devices necessary for the development of multimedia content. (2 × 1) (2)

3.7 Name TWO devices used to play back multimedia content. (2 × 1) (2)

3.8 Name TWO file formats generally readable by most word processing packages as well as reading devices. (2 × 1) (2)

[25]

QUESTION 4

4.1 Answer the following questions on master pages in InDesign:

4.1.1 Define a *master page*. (2)

4.1.2 Give TWO advantages of using a master page when designing a document like a brochure. (2 × 1) (2)

4.1.3 Give FOUR examples of items that could be part of a master page of the brochure. (4 × 1) (4)

4.2 Discuss how the concept of text wrapping works when creating documents. (2)

4.3 List FIVE job titles found in the pre-production stage of a multimedia production team. (5 × 1) (5)

4.4 Give TWO examples of software suitable for processing the following types of multimedia content:

4.4.1 Sound

4.4.2 Graphics

4.4.3 Video

(3 × 2) (6)

4.5 Give TWO examples of file formats that could be used for saving a:

4.5.1 Song

4.5.2 Photograph

(2 × 2) (4)

[25]

QUESTION 5

5.1 Discuss THREE processes in the pre-production phase of multimedia production. (3 × 2) (6)

5.2 List FOUR aspects that are usually part of the production plan. (4 × 1) (4)

5.3 Describe the functionality of a storyboard in the planning stage of a video production. (4)

5.4 Discuss the concept of a user interface. Make use of an example in your explanation. (4)

Copyright reserved

5.5 List THREE stages of the post-production phase of a multimedia project. (3)

5.6 Explain the following multimedia terms:

5.6.1 Props 

5.6.2 Sound effects

(2 × 2) (4)
