- Fry at the correct temperature; too high a temperature will lead to rapid browning of food, without cooking properly.
- Too low a temperature will lead to the food absorbing lots of oil, higher costs, oily foods and prolonged frying time.
- Prepare food correctly. Even sized portions will ensure even browning.
- Ensure that the crumbs on crumbed foods are firmly attached to avoid too many crumbs in the oil, that will burn and cause a smoking effect.
- Use one part of food to six parts of oil.
- Skim the surface regularly to remove left-over particles that can brown, burn and cause smoke.
- Do not season food prior to frying, since salt increases the breaking down of the oil.
- Filter the oil daily to prolong the shelf life.
- Clean the fryer at regular intervals. (Any 7 × 1) (7)
