SECTION A: COMPREHENSION

QUESTION 1

Read TEXT A and answer the questions.

TEXT A: CODING AFTER DARK

1 At 21:00 every weeknight, when most shops in Mamelodi have pulled down their shutters, a small internet café on the main road stays lit. Inside, a dozen young people sit shoulder to shoulder, their faces lit blue by second-hand monitors. They are not gaming. They are writing code.

2 The group calls itself "Night Shift". It was started two years ago by Kagiso, then a 19-year-old who had failed to get a university place and was, in his own words, "sitting at home becoming a professional sleeper". Free online courses taught him the basics of web design, but data was too expensive to study at home. The café owner agreed to let him use a computer after closing time in exchange for building the café a website. Within a month, three friends had joined him.

3 The rules are simple. Nobody pays, but everybody teaches. If you learn something new, you explain it to the next person before you go home. "Teaching is the best test," Kagiso says. "If you can't explain it, you don't really know it."

4 The results have surprised even the members. Four of them now earn money building websites for local businesses: a spaza shop, a hair salon, a funeral parlour and a soccer club. One member was offered a learnership at a bank in Pretoria after a recruiter saw an online shopping app she had built for her mother's catering business.

5 The journey has not been smooth. Load shedding has cut many sessions short, and in winter the café is freezing. Some parents were suspicious at first; one mother arrived at midnight, convinced that her son was lying about where he spent his evenings. She left an hour later, having learnt how to make a simple webpage herself.

6 Critics argue that groups like Night Shift are a sticking plaster on a broken system, and that young people should not need to study in a café at midnight to get skills. Kagiso agrees, but only partly. "Of course the system must change," he says. "But I'm not going to wait for it. Waiting is also a decision."

SECTION B: SUMMARY

QUESTION 2

Read TEXT B. Summarise, in your own words, SEVEN things a person should do to prepare for a job interview. Write SEVEN numbered sentences in point form, not more than 70 words. Indicate the number of words at the end.

TEXT B: GETTING READY FOR THE BIG DAY

A job interview can be stressful, but good preparation makes a huge difference. Start by finding out as much as you can about the company: what it does, who its customers are and what its values are. Read the job advertisement again and think of examples from your own life that show you have the skills they want.

Practise answering common questions out loud, perhaps with a friend or family member playing the interviewer. Prepare one or two questions of your own to ask at the end, because this shows real interest. The day before, choose neat, clean clothes that suit the workplace, and put copies of your CV, ID and certificates in a folder.

Plan your route and leave early, aiming to arrive about fifteen minutes before your appointment. Finally, switch off your phone before you walk in, greet everyone politely, and remember to make eye contact and smile.
