INSTRUCTIONS TO MARKERS

To facilitate marking and moderation, the following must be adhered to when marking:

Manipulation:

- Use a **blue pen** for **all** manipulation commands carried out
- Use a **tick**/s and the question number for every **correct** manipulation carried out, as indicated in the marking guideline
- Use a **X** (cross) to mark manipulation incorrectly done.
- The **question number** must be written next to every **tick** or **X** (e.g. 1.3✓✓)

Accuracy:

- Use a **red tick** to indicate **all** accuracy marks
- Use a **red X** to indicate **all** accuracy errors
- For each command, the **question number** must be written next to every **tick** or **X** (e.g. 1.4 ✓✓✓✓XX)

Timed accuracy test:

- The timed accuracy test will be marked according to the given schedule for QUESTION 1
- A candidate failing speed, but obtaining 50% or more for the whole examination paper, is competent in the examination
- A candidate passing speed, but failing the examination paper, FAILS the examination paper as well as the speed

---

QUESTION 1: TIMED ACCURACY TEST

NOTE: THE ACCURACY TEST MUST BE MARKED VERY CAREFULLY AS IT IMPACTS ON THE RESULTS. MARK ACCURACY ERRORS ONLY.

1. The mark schedule attached must be used to allocate marks

2. When the same word is repeatedly typed incorrectly, it is penalised the first time only (once) and encircled thereafter, per question.

3. Omission of words: Count the first 5 strokes (including spaces) and thereafter every 10 strokes is 1 error each.

4. Should a word/s or a paragraph be omitted, but it appears at the bottom of the answer, only ONE accuracy error will be deducted and it must not be penalised as an omission of words.

5. Should words or a paragraph be repeated, only ONE accuracy error will be deducted for all the words or paragraph.

Copyright reserved

6. If 40 wpm is not reached count backwards for words omitted (which are penalised as errors), as indicated in the marking guideline by the numbers above the words – which indicate the errors for words omitted. The same can be done if a student has passed 40wpm and may have one or two words to 45 wpm; however, the speed with the highest marks must be selected.

7. Indicate the speed obtained with a P/S (Pass Speed) 40w.p.m./45w.p.m or F/S (Fail Speed), on the students cover page next to the mark for the speed and indicate the speed obtained next to the percentage obtained.

8. In QUESTION 1**,** the highest mark obtained will be indicated; number of errors, the highest speed obtained as well as whether it is a pass or fail as set out below: e.g.

Pass/Fail Speed	**P/S**
No. of errors	**3**
Mark Achieved	**17/20**
WPM achieved	**40 wpm**

10. The speed reached is endorsed on the cover of the answer sheet; next to the percentage obtained for the entire paper (within the circle), e.g.

40wpm

11. Do NOT penalise the following:
- Incorrect casing (capital/lower case)
- Incorrect letter spacing
- Incorrect hyphenation
- Incorrect line spacing
- Incorrect paragraphing
- Incorrect justification

MARGIN OF ERRORS	**5%**	**5%**	**5%**
Words Per Minute	**40**	**45**	**50**

QUESTION 1

In South Africa, the right to water is enshrined in the constitution and implemented by ordinary statutes.	56 108
Conserving water not only has an enormous effect on the environment and the ongoing shortage of water in South Africa, but it can also save you a significant amount of money as you consume and thereby heat less water each year.	164 226 289 335
Water conservation is particularly important in South Africa, where not everyone has easy access to clean drinking water and where the installation of one tap in an informal settlement is considered an achievement. Part of the battle to provide clean drinking water for all South African citizens is to balance the needs for sustainable and responsible water use with the needs of a growing urban population and the pressures on existing water systems.	399 462 525 589 653 716 776 790
Companies stock a range of products and equipment to aid residential and commercial efforts to conserve water. From water conserving shower heads to low-flush toilet products to organic composters and garden/agriculture products that lend to the natural conservation of water, we want the products and equipment necessary to make conserving water as easy as possible.	847 906 968 1032 1092 1148 1157
Repairing leaking taps and pipes is one of the easiest methods to conserve water in and around the home; another water conservation tip is to teach children to switch off taps when they brush their teeth or wash their faces. By educating kids about the importance of water conservation early on you can create water saving advocates for the future.	1220 1276 1338 1400 1460 1505

Studies show that an average suburban house can reduce its water consumption by 30-40% without much effort or sacrifice. With some simple water recycling solutions you can cut your water consumption by half per day. And, if you add recycling grey water to your efforts, you can increase that figure to 60%.	1564 1627 1683 1751 1811
40 wpm Grey water is the water that is left at the end of certain domestic processes,such as showering,bathing and washing dishes and laundry.More than 50% of domestic waste water production is grey water, which means that any recycling system you use has an enormous impact on household water consumption. The water left over after you have washed your car is also considered grey water.	1811 1872 1929 1987 2044 2102 2161
45 wpm Recycling car wash water is probably the easiest way to recycle water because all you have to do is slosh it over your lawn.	2195 2259
Recycled water is better suited to certain purposes than others. Recycled grey water should never be used for potable water purposes like cooking or drinking without proper purification. **50 wpm**	2319 2378 2440 2495 2508

DATABASES [60]

QUESTION 3A

3.1 Created a database and table using appropriate data types, distinguishing between text, numbers, currency and so forth.

3.1.1 Opened the database program on your computer and created the database SHOWER. Created the table below and used the file name SHOWER HEADS and EXAMINATION NUMBER: (8)

FIELD NAME	DATA TYPE	FIELD SIZE/FORMAT
CODE	TEXT/Short Text	4
ITEM	TEXT/Short Text	20
STOCK ON HAND	NUMBER	0 Decimal places
RE-ORDER LEVEL	NUMBER	0 Decimal places
PRICE PER UNIT	CURRENCY	Default settings
PURCHASE DATE	DATE	Long date

3.1.2 No primary key selected. (1)

3.1.3 Printed the structure of the table and saved. (1)

3.1.4 Entered the following records in the database: (14)

CODE	ITEM	STOCK ON HAND	RE-ORDER LEVEL	PRICE PER UNIT	PURCHASE DATE
C345	Idyllic Rain	55	10	R566,44	27 November 2018
N129	Idyllic Rain Pro	45	5	R999,99	22 May 2018
G429	Idyllic Rain Cube	36	5	R876,22	28 November 2018
F765	Idyllic Hand Shower	23	3	R1 500,20	13 August 2018
L519	Rose Shower	120	20	R120,45	17 October 2018
C296	Rose Kubo	14	10	R323,87	17 March 2018
D348	Tseyu Kubo	34	10	R195,99	29 August 2018
Y931	Tseyu Standard	155	50	R155,00	30 May 2018

3.1.5 Saved the table and made a printout in landscape orientation ensuring that all data is clearly displayed on one page. (2)

3.1.6 Sorted the table in ascending order, according to the STOCK ON HAND field. (2)

3.1.7 Changed the field properties of the ITEM field to 21. (2)

Copyright reserved

3.1.8 Inserted a new record as shown below. (4)

CODE	ITEM	STOCK ON HAND	RE-ORDER LEVEL	PRICE PER UNIT	PURCHASE DATE
Q191	Idyllic Rain Standard	12	6	R699,57	1 March 2018

3.1.9 Printed the table ensuring that all fields and corresponding data are appropriately displayed on one page. (2)

QUESTION 3B

3.2 Created and edited QUERIES in the database.

3.2.1 Created a query using the SHOWER HEADS table with the following fields: ITEM, PRICE PER UNIT and PURCHASE DATE. (4)

3.2.2 Added more than one criterion to filter the Price Per Unit field to only show records which are higher than R800 and purchased between 1 August 2018 and 30 November 2018. (4)

3.2.3 Saved the query as QUESTION 3B and your EXAMINATION NUMBER. Printed ONE copy of the query. (2)

QUESTION 3C

3.3 Created and edited FORMS in the database.

3.3.1 Used the default settings to create the forms using the SHOWER HEADS table with the following fields: ITEM, STOCK ON HAND and RE-ORDER LEVEL. (4)

3.3.2 Changed the Form Title to SHOWER STOCK FORMS and EXAMINATION NUMBER. (2)

3.3.3 Inserted the image called SHOWER from the STUDENT FILES folder as a logo to appear on the left side of the heading. (3)

3.3.4 Inserted a page break to separate the forms. (1)

3.3.5 Saved the forms as QUESTION 3C and pasted a print screen image of the form in design view in the space provided in the answer sheet. (2)

3.3.6 Printed only the first record of the forms in portrait orientation. (2)

QUESTION 4A

Created own template, using a presentation application to apply basic actions and format a presentation.

4.1 Opened the answer sheet file QUESTION 4, from the STUDENT FILES folder. Inserted examination number in the space provided in the header.

4.1.1 Opened a blank presentation and saved as a PowerPoint template called DROP. (2)

4.1.2 Created a print screen image to show the dialog box how the file was saved as a template and pasted it in the space provided in answer sheet file. (1)

4.2 Used the Slide Master View to edit the template DROP as shown below.

4.2.1 Applied a theme of choice with a light background colour. (2)

4.2.2 Applied a font of choice to all layouts. (2)

4.2.3 Inserted a header to appear in the centre of all slides:

DROP BY DROP (4)

4.2.4 Selected the title placeholder and applied the following custom animation:

- Animation: Swivel
- Start: On Click
- Duration: 02.00 (7)

4.2.5 Saved the presentation as DROP2 and created a print screen image showing the Animation pane and the selections made in Q4.2.1-Q4.2.4. Pasted the image in the space provided in the answer sheet file. (3)

4.3 Formatted the presentation DROP2, as follows:

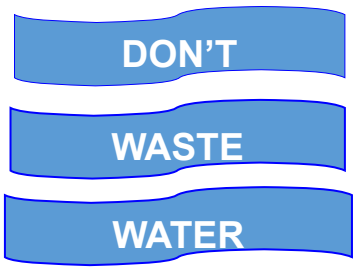

4.3.1 Selected the title placeholder in Slide 1 and inserted the following text:

RESPECT WATER, RESPECT LIFE! (3)

4.3.2 Inserted the image called DROPS from the STUDENT FILES folder in the title placeholder of Slide 1 where it looks best. (3)

4.3.3 Inserted a blank slide to become Slide 2. (1)

4.3.4 Inserted the flowchart shape called Punched Tape in Slide 2 and made 2 more copies of the shape as shown below.

(3)

4.3.5 Aligned the shapes as set out above and added the text using font size 44pt. (5)

4.3.6 Inserted the following speaker note in Slide 2:

South Africa is classified as a semi-arid country and many people do not have access to enough water. (5)

4.3.7 Grouped the 3 flowchart shapes together in Slide 2. (2)

4.3.8 Made a print screen image of Slide 2 in Outline View to show the grouping of the shapes and the speaker note. Pasted the image in the space provided in the answer file. (2)

4.3.9 Inserted a new slide as Slide 3 and in Title and Content slide format. (2)

4.3.10 Inserted the following title:

Water footprint of 1 kg bread = 1 600 litres of water (4)

4.3.11 Inserted a table with the following text just below the title:

GREY WATER	11%
BLUE WATER (IRRIGATION)	19%
GREEN WATER (RAIN)	70%

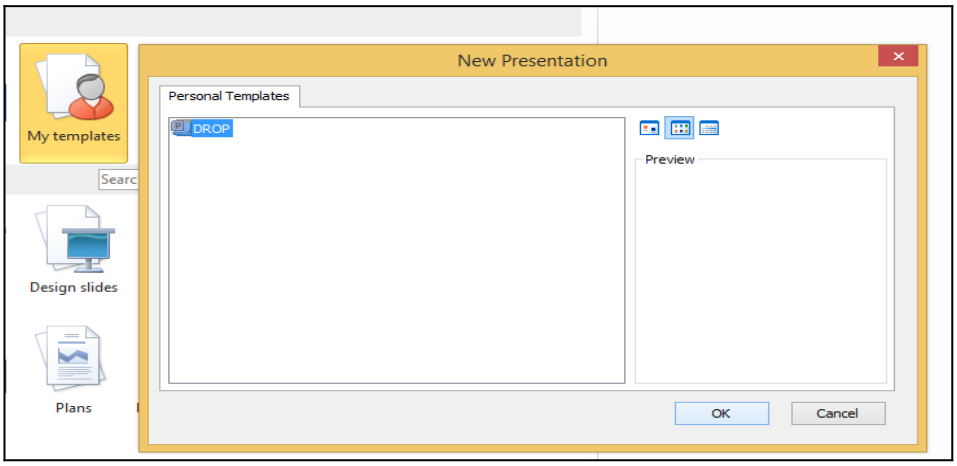

(6)

4.3.12 Inserted details as a header against the left margin as follows:

EXAMINATION NUMBER
QUESTION 4

Saved the presentation as DROP2 and printed as handouts, 3 slides per page. (3)

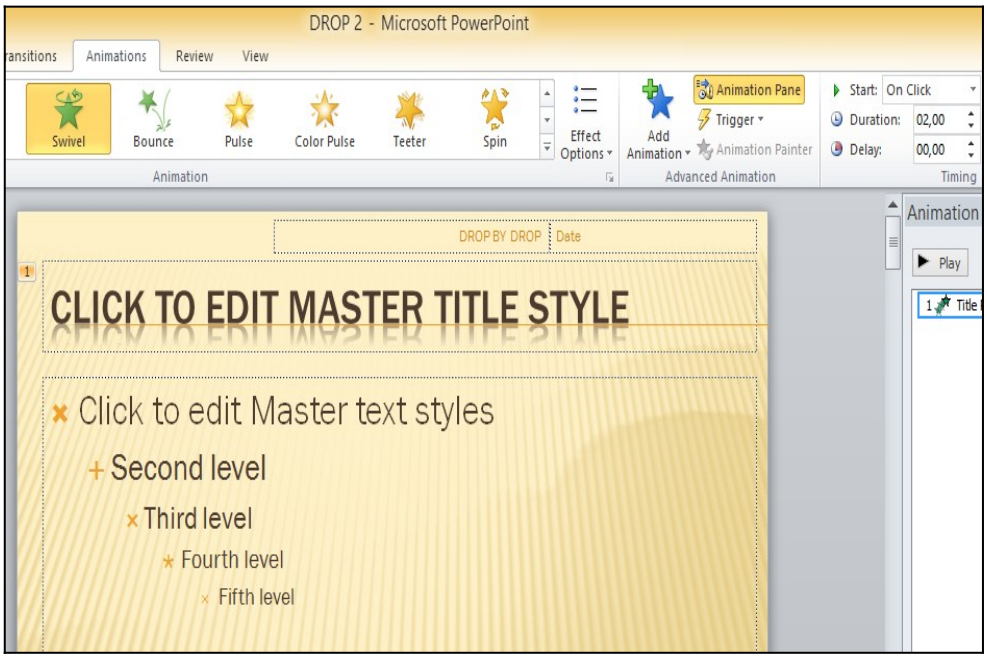

[60]

4.1.1 save as template✓

QUESTION 5

5.1 Retrieved the answer sheet file QUESTION 5 from the STUDENT FILES folder and pasted ALL print screen images in the space provided as required for each question. Printed the document at the end of the question.

Retrieved the spreadsheet file saved as LEVELS from the STUDENT FILES folder. (1)

5.1.1 Copied the contents of the PROVINCES worksheet to the DUPLICATE sheet, keeping the same format. (3)

5.1.2 Made a print screen image of the DUPLICATE sheet to show the copy and paste function performed and pasted in the spaced provided in the answer sheet. (1)

5.1.3 Deleted Row 4 in the PROVINCES worksheet. (2)

5.2 Used the Custom Filter function in the PROVINCES worksheet to do the following:

5.2.1 (a) Applied a filter to show only the Western Cape dams. Copied and pasted it in the WP sheet from A2. (4)

(b) Made a print screen image of the WP sheet and pasted in the space provided in the answer sheet. (1)

(c) Applied a filter to show only the KwaZulu-Natal dams. Copied and pasted it A2 in the KZN worksheet. (4)

(d) Made a print screen image of the KZN sheet and pasted in the space provided in the answer sheet. (1)

5.3 Edited the DUPLICATE worksheet as follows

5.3.1 (a) Sorted the range A5:F47 according to Column D from largest to smallest. (4)

(b) Made a print screen image and pasted in the space provided in the answer sheet. (1)

(c) Sorted the range A5:F47 according to Column E from smallest to largest. (4)

(d) Made a print screen image and pasted in the space provided in the answer sheet. (1)

Copyright reserved

5.3.2 (a) Used the Freeze Panes function to display only Rows 40 to 47. (3)

(b) Made a print screen image and pasted in the space provided in the answer sheet. (1)

5.3.3 Inserted the comment below in bold print in B45.

This dam is one of the smallest dams reviewed in this report. (6)

5.3.4 Inserted Examination Number and QUESTION 5.2.4 in the centre section of the header.

Printed this worksheet with the row and column headings and the comment as displayed on the sheet in B45. Adjusted margins if necessary to print on one sheet. (5)

5.4 Imported the WP worksheet space in the answer sheet. (2)

5.5 Formatted the KZN worksheet as shown below:

5.5.1 Protected this worksheet with ODPL4 as password. Made print screen images as indicated below and paste in the space provided in the answer sheet. (2)

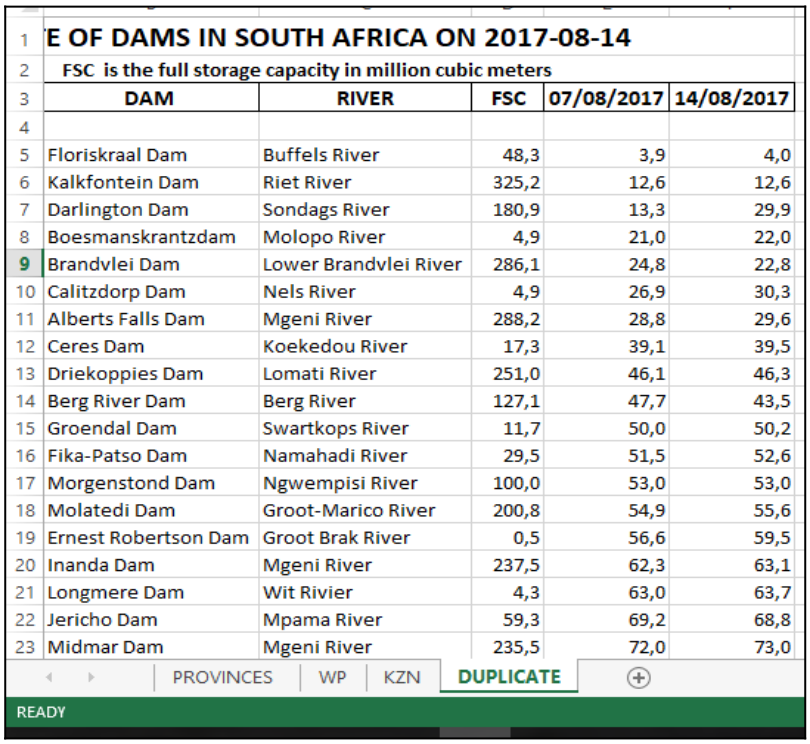

(a) Protect Sheet dialog box; (2)
(b) Confirm Password dialog box; (2)
(c) MS Excel window with the Changes Tab visible for this worksheet. (3)

5.5.2 Tried to delete the content of C7, made a print screen image to show the dialog box stating that the sheet is protected and paste in the space provided in the answer sheet. (4)

5.5.3 Protected the workbook with a password of your choice, made a print screen image of the workbook window and pasted in the space provided in the answer sheet. (3)

.

QUESTION 6

6.1.1 Opened the file PROTECT from the STUDENT FILES folder and used the password ODPL4 to protect the document from unauthorised persons. (2)

6.1.2 Created TWO print screen images to show the following:

(a) The dialog box to show the encryption process. (2)

(b) The dialog box when the password is re-entered. (2)

6.2 Created a new e-mail in Microsoft Outlook as shown below: (1)

6.2.1 Created a signature named ZIYANDA using a font of your choice to insert at the end of the e-mail message:

ǂ
Regards
ǂ
ZIYANDA MTANA
ziyanda@dropbydrop.com

Your Examination Number } Arial 12pt
QUESTION 6 (3)

6.2.2 Inserted the image DROPS from the STUDENT FILES folder to appear below the signature and resize it smaller. (3)

6.2.3 Created a print screen image of the Stationery and Signatures dialog box and pasted in the space provided in the answer sheet. (2)

6.2.4 Composed the following e-mail message:

To: k.magopeni@gmail.com
naidoo.mm@intake.co.za (2)

6.2.5 Cc: m.windvogel29@dropbydrop.com (1)

6.2.6 Attached the encrypted file named PROTECT in the STUDENT FILES folder to the message. (1)

6.2.7 Subject: UPCOMING SYMPOSIUM ON WATER FOOTPRINTS (2)

6.2.8 Typed the following message:

Good day

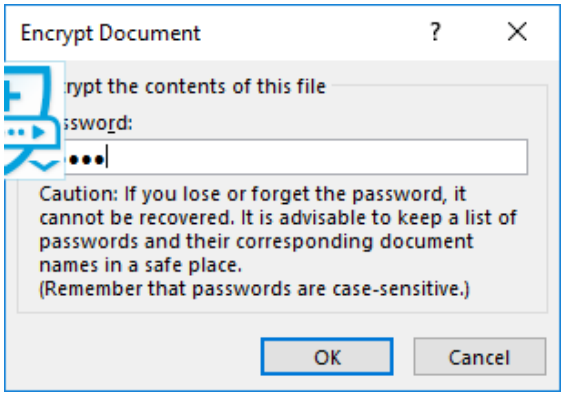

Please receive herewith your program and material for the symposium on water footprints and other important issues around the conservation of water.

Make sure that you save and use the password that was forwarded to you today by SMS to open the encrypted document. (6)

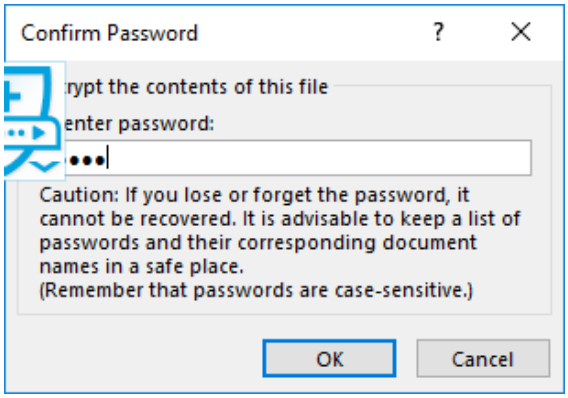

6.2.9 Inserted the Signature ZIYANDA at the end of the message. (2)

6.2.10 Made a print screen image of the e-mail message to show the results for Q6.2.5-Q6.2.10 and pasted in the space provided in the answer sheet. (1)

3 Line spacing

1 L/M 1.5"/3.81cm **1 R/M 1"/2.54cm**

SAVE IT DROP BY DROP **4 uppercase** **5 bold**
3 line spacing
1 right align
LET US STOP OUR BAD HABITS AND SAVE WATER

3 line spacing **7 paragraph number** **9 indentation** **3 letter spacing**
1. Turn off the tap when you brush your teeth – this can save 6 litres of water per minute. **6 number format**
‡ **3 line spacing**
2. Place a cistern displacement device in your toilet cistern to reduce the volume of water used in each flush.
‡ **3 line spacing**
3. Take a shorter shower. A shower can use anything between 6 and 45 litres per minute. **6 number format**
‡ **3 line spacing**
4. Always use full loads in your washing machine and dishwasher – this cut out unnecessary washes in between.
‡ **3 line spacing**
5. Water your garden with a watering can rather than a hosepipe, which uses 1 000 litres of water an hour.
‡ **6 number format**
INVEST IN WATER-EFFICIENT DEVICES **4 uppercase** **5 bold**
‡ **3 line spacing**
You can buy water-efficient:
‡ **3 line spacing**
- Shower heads **3 line spacing**
- Taps **4 uppercase/lowercase**
- Toilets **8 bullets**
- Washing machines **9 indentation**
- Dishwashers

10 audio instructions typed
