TOTAL SECTION A: [30]

SECTION B

Read the case study and use it where asked.

Case study: Lerato's Tech Fix

Lerato completed NC(V) Level 2 in Information Technology. Many people in her township have cracked cellphone screens and slow laptops, but the nearest repair shop is 25 km away in town. Lerato plans to start a small repair service from a container near the taxi rank. She has R8 000 savings. She will repair screens, remove viruses and install software. A competitor recently started fixing phones from his home in the next street, but he is often closed. Lerato is good with people, works hard and is not afraid of failure.

QUESTION 2: THE ENTREPRENEUR AND BUSINESS OPPORTUNITIES

2.1 Name FOUR characteristics of a successful entrepreneur. Use the case study to support TWO of them. (6)

2.2 Explain the difference between a business idea and a business opportunity, with reference to Lerato. (4)

2.3 Do a SWOT analysis for Lerato's Tech Fix (ONE point for each of strengths, weaknesses, opportunities and threats). (8)

2.4 Give TWO ways in which entrepreneurs benefit the South African economy. (2)

[20]

QUESTION 3: FORMS OF OWNERSHIP AND SUPPORT

3.1 Recommend a suitable form of ownership for Lerato. Give TWO advantages and ONE disadvantage of this form. (5)

3.2 Lerato's friend Sipho wants to join the business. Name TWO things that should be included in a partnership agreement. (2)

3.3 Name THREE sources of finance Lerato could use if her savings are not enough. (3)

3.4 Name FIVE legal or official requirements Lerato must meet to run her business properly. (5)

[15]

QUESTION 4: MARKETING

4.1 Describe Lerato's target market. (2)

4.2 Apply each of the four Ps of the marketing mix to Lerato's Tech Fix. (8)

4.3 Suggest TWO low-cost ways for Lerato to advertise her business. (2)

4.4 Give THREE ways Lerato can provide good customer service so that customers return and recommend her. (3)

[15]

QUESTION 5: COSTING, PRICING AND THE BUSINESS PLAN

5.1 Lerato's monthly costs are: container rent R1 200, electricity R400, cellphone data R300. A replacement screen costs her R350, and she charges R600 to fit it.

5.1.1 Calculate her total fixed costs per month. (2)

5.1.2 Calculate the contribution (profit before fixed costs) on one screen repair. (2)

5.1.3 How many screen repairs must she do per month to break even? (3)

5.1.4 Calculate her profit in a month in which she fits 20 screens (ignore other work). (3)

5.1.5 Calculate her mark-up on the screen as a percentage of cost (to two decimal places). (3)

5.2 Name SIX sections that should be included in Lerato's business plan. (6)

5.3 Give ONE reason why an entrepreneur should keep personal money and business money separate. (1)
