SECTION A

QUESTION 1: INFORMATION SYSTEMS

1.1
- For what will the computer be used?
- What type of software is required (operating system and applications)?
- What RAM memory capacity is required?
- What hard disk/storage capacity is required?
- What input ports and drives are required?
- Do you need bluetooth?
- Wireless capacity
- Type of computer: Laptop/desktop
- CPU/Processor (Clock speed, bus width and type)
- Manufacturer support: Warranty and technical support available?
- Additional hardware and peripherals required: Keyboard/Mouse
- Graphics and sound cards/Speakers and microphones
- Is webcam included? (Any relevant answers 5 × 1) (5)

1.2 Outright purchase:✓
- Cheapest form of financing.
- Buyer immediately the owner.
- Wear and tear tax deductible.
- Increase of assets reflected on balance sheet.
- Recovery of initial outlay if equipment is sold. (Any 1 × 1)

Leasing:✓
- More flexible that purchase.
- No cash flow problems.
- Free choice at low risk.
- Access to better equipment.
- Maintenance usually included in agreement.
- Lease may be extended at reduced premiums.
- Payment is tax deductible.
- Cheaper than rental from manufacturer. (Any 1 × 1)

Suspensive sale agreement:✓
- Equipment as asset on balance sheet.
- Full cost price plus interest is depreciated over 3 or 4 year period.
- The user becomes the owner. (Any 1 × 1)
-
- Rental from the manufacturer:✓
- No initial capital outlay.
- Rent payment is tax deductible.
- Maintenance provided by the manufacturer. (Any 1 × 1)

(3 × 2) (6)

[11]

QUESTION 2: OPERATING SYSTEMS

2.1	2.1.1	True		
	2.1.2	False		
	2.1.3	True		
	2.1.4	True		
	2.1.5	False		
	2.1.6	True		
	2.1.7	True		
	2.1.8	False		
	2.1.9	True		
	2.1.10	False		
			(10 × 1)	(10)
2.2	2.2.1	TESTS		
	2.2.2	28 May 2018		
	2.2.3	E-drive / E:\		
	2.2.4	37 files, 8 folders		
			(4 × 1)	(4)
				[14]

QUESTION 3: VIRUSES

3.1	N
3.2	A
3.3	M
3.4	I
3.5	B
3.6	J
3.7	D
3.8	F
3.9	H
3.10	L
3.11	G
3.12	E
3.13	K

(13 × 1) **[13]**

QUESTION 4: TROUBLESHOOTING

4.1 4.1.1

- Fasten and protect cables properly.
- Avoid eating and drinking near the keyboard.
- Gently shake or blow out dirt regularly.
- Wipe the top of the keys with alcohol. (Any 2 × 1)

4.1.2
- Use the mouse on a clean surface.
- Ensure cables are inserted properly.
- Clean the ball/optical sensor of the mouse regularly. (Any 2 × 1)

(4)

4.2 4.2.1 Can be caused by:
- Software issues (Updates, Virus/Malware).
- To many programs open.
- Outdated or corrupted drivers.
- Operating system not updated.
- Heat related (fan not working or dust on fans).
- Hardware malfunction or misconfiguration.
- Push the Ctrl Alt and Delete keys at the same time. Then start the Task Manager, highlight the program's name and press the End Task button.
- Perform a hard reboot by simply pressing the on/off button to turn off the computer manually. This action should only be done as a last resort if you have an unresponsive program or critical error. This process could cause data loss or corruption.
- Once the computer is responding again, run a virus check.

(Any 2 × 1) (2)

4.2.2 Can be caused by:
- Bad, corrupted or fragmented hard drive
- Malware/viruses
- Hardware conflicts
- Windows or drivers not updated.
- Verify that there is enough (at least 200-500 MB) free hard drive space.

If you need to free space:
- Empty your recycle bin.
- Perform a disk clean-up/delete temp files.
- Run defragmentation.
- Remove old or unused programs.
- Remove unused shortcuts and disable unused program services.
- Restart your computer.
- Run a virus scan to remove potential viruses that can slow down your computer. (Any 3 × 1) (3)

4.2.3

- Check if the printer is turned on. If not, turn it on and try again.
- Check for warning lights or error messages.
- Check if the printer has paper or ink/toner. If not, put paper in the paper tray or replace the ink/toner and try printing again.
- Check if the printer has a paper jam or there is paper in the tray. If so, remove the paper jam or insert paper, close the printer and try printing again.
- Ensure that all printer cables are properly connected or Wi-Fi or Bluetooth enabled.
- Turn off the printer and turn on again.
- Check to see if a new/updated printer driver is needed.
- Reboot your computer and the printer, wait for a few minutes and power them on again.
- Check that the printer is set as default printer.
- Cancel all print jobs to cancel failed print jobs. (Any 3 × 1) (3)

[12]

MARKING GUIDELINE: QUESTION 6A	
ACCURACY: 8 MARKS	
8	All keying in data (also header (1A maximum), footnote (1A maximum)). Check commas between merge fields

MANIPULATION: 30 MARKS	
1	[EXAMINATION NUMBER] left, [QUESTION] 6A right
2	Font: Arial 12 pt for the whole document
3	Margins: 1,27 cm
4	Letterhead with footer
5	3 tables inserted: Auto fit to window (do not exceed the margins), correct number of rows and columns
6	Row height in first table: 0,7 cm
7	All cells centred vertically (best seen in first and last table (first row))
8	Headings, column headings, [SUBTOTAL], [VAT @ 15%] and [TOTAL PAYABLE]: bold and upper case
9	Column/rows shaded (25% grey)
10	Merge fields are bold
	Merge fields inserted:
11	[CUSTOMER ID]
12	[NAME]
13	[SURNAME]
14	[CONTACT NAME]
15	[CONTACT NO1]
16	[CONTACT NO2]
17	[STREET]
18	[SUBURB]
19	[CITY]
20	Footnote inserted after [PRICE]. Footnote number 1
21	Symbol (✓) inserted
22	Text wrapped: [UNIT PRICE] and [(R)]. No other text are wrapped
23	Single borders
24	1½ pt borders
25	CALCULATIONS: [PRICE] - all calculations correct
26	[SUBTOTAL] correct
27	[VAT @ 15%] correct
28	[TOTAL PAYABLE] correct
29	All calculations: currency, 2 decimals
30	Footnote text inserted, footnote number 1: [Per month for a 24 months contract period]
31	Line spacing
32	Letter spaces (check spaces between merge fields)
33	Upper case/lower case
34	Any other errors

A	M	T
8	**30**	**38**

TAKE NOTE: Do NOT award marks **11** to **19** if the fields are NOT in the correct default merge form, e.g. <<CUSTOMER_ID>> (thus NOT suitable for merging). Check the underscore (_) in « CUSTOMER_ID », etc. as well as the default merge brackets. If the fields are in the correct form, but the [ ] brackets were inserted, penalise with 1 accuracy mark.

QUESTION 7

✓ 1. Exam no left, QUESTION 7 right (1A max)

EXAMINATION NUMBER (COMPUTER NO) ✓ 2. Rockwell 12pt (All text and header) QUESTION 7

✓ 3. Margins 1,27 cm

✓4. Insert correct SmartArt and size
✓5. Text inserted, Rockwell 32 pt Black (1A max)
✓6. Shape outline: Black, weight 2¼ pt, no fill

Fibre is the fastest thing this side of the sun and everybody's talking about it. So what's all the fuss about? Is it simply about speed, or is there more? Read on to find out how fibre compares to ADSL[2] and whether taking the fibre plunge is worth it!

✓7. Endnote, start at 2

$$ASDL\ Speed \leq 40\ Mbps + \sqrt{\frac{Cable\ diameter + type}{Distance}} + \iint Data$$

EQUATION: ✓8. ✓9. ✓10. ✓11. Right-aligned & 16 pt (1A)

1) ADSL – THE FACTS

a) ADSL, or asymmetric digital subscriber line, uses copper cable and offers high-speed connectivity as opposed to older technologies such as dial-up internet that worked through a landline with a modem.

COLUMNS: ✓12. 2 Columns, correct text ✓13. In line

i) **Cons:**

✓14. Cons: Left Pros: Right

(1) The further your home is from the Telkom exchange (little structures set up in certain neighbourhoods where connections meet locally) the slower the ADSL speed.
(2) ADSL is susceptible to electrical interference.
(3) ADSL requires a lot of maintenance, which means there are often reliability issues.
(4) You need a landline to be able to access the internet with ADSL.

ii) **Pros:**

(1) It is available in most areas.
(2) It offers competitive speeds for users who are seeking basic connectivity and are not overly active online.
(3) There are capped and uncapped versions available depending on your needs.

Find & Replace:
✓15. Mbps with **MEGABITS PER SECOND**. 5x
✓16. Upper case, bold, underline
(award only when the function was used)

iii) **Available speeds:**

(1) ADSL is available in the following speeds: 1, 2, 4, 8, 10, 20 and 40 **MEGABITS PER SECOND**.

✓17. Page breaks correct: all pages

Copyright reserved

QUESTION 7 (CONTINUED)

EXAMINATION NUMBER (COMPUTER NO) QUESTION 7

2) FIBRE – THE FACTS

a) Fibre, or fibre optics, literally harnesses the speed of light by transferring data through means of glass cabling. This makes it the fastest and most reliable form of internet connectivity currently available.

i) **Pros**:

(1) And the best part about fibre is that new ways might be found to transmit light data even faster without the infrastructure becoming redundant.
(2) Capped and uncapped options are being rolled out as you read.
(3) Data can travel up to 50 km to/from an exchange before any form of degradation in speed takes place! So it does not matter how far you are from your exchange.
(4) Fibre cabling itself is similar in price to the copper used for ADSL, but much easier to maintain.
(5) This technology offers several benefits such as clarity and reliability in data transfer. One of the reasons for this is that glass cannot conduct electricity, so electrical storms, for instance, cause less interference on the lines.
(6) You do not need a landline to access the internet with fibre.

✓18. Sorted A-Z

ii) **Cons**:

(1) The biggest drawback to fibre at the moment is that it is new on the market and not available in all locations yet!
(2) That said, Khawuleza can already offer fibre access in almost 100,000 locations, so it is worth checking whether you are eligible.

iii) **Available speeds**:

(1) Fibre is available in the following speeds: 2, 4, 8, 10, 20, 40, 50 and 100 **MEGABITS PER SECOND** (depending on the fibre provider).

(a) Format correct (number format, indent and number order)

(b) Correct text selected

Automatic paragraph numbering:

✓✓19(a) & 20(b) Level 1: 1) Check that equation is not numbered

✓✓21(a) & 22(b) Level 2: a)

✓✓23(a) & 24(b) Level 3: i)

✓✓25(a) & 26(b) Level 4: (1)

✓27. Paragraphs correctly indented

✓28. Landscape, only this page

QUESTION 7 (CONTINUED)

EXAMINATION NUMBER (COMPUTER NO) QUESTION 7

3) **ADSL VS FIBRE**

✓27.

Why is fibre so desirable? While the blistering speed is the most attractive prospect to many people, the true beauty of fibre lies in its reliability, and it's not being dependent on a land-line. If you can get fibre in your area, swapping out a 40 **MEGABITS PER SECOND** ADSL line for a 40 **MEGABITS PER SECOND** fibre line makes sense when you consider that your extraordinarily fast internet won't fail you when you need it most – and if you can get something faster, even better!

✓29. *Equation copied, correct*

$$ASDL\ Speed \leq 40\ Mbps + \sqrt{\frac{Cable\ diameter + type}{Distance}} + \iint Data$$

✓30. *Endnote text inserted, no 2 (1A)*

[3] Asymmetric Digital Subscriber Line

✓31. *Line spacing, letter spaces, uc/lc*

✓32. *Hyphenation, justified, any other error*

QUESTION 7 (CONTINUED)

MARKING GUIDELINE: QUESTION 7
ACCURACY: 3 MARKS
Accuracy errors in header and SmartArt (1 mark max) Accuracy errors in text of equation (1 mark) Accuracy error in endnote (1 mark)

MANIPULATION: 28 MARKS	
1	HEADER: [Examination number and computer number] left-aligned; [QUESTION 7] right-aligned
2	Document Rockwell 12 pt. All text including header, SmartArt and endnote
3	Margins 0,5"/1,27 cm
4	Correct SmartArt and size: Approximately 4 cm (height) x 15 cm (width)
5	Text inserted, Rockwell 32 pt, Black
6	Shape outline: Black, weight: 2¼ pt, no fill
7	Endnote inserted after ADSL in first paragraph: number 2
8, 9, 10	Equation inserted: Correct and part of the equation. -1 per error (not accuracy errors)
11	Equation right-aligned and 16 pt
12	Two columns. Correct text per column
13	Cons and Pros in line
14	Cons: Left column; Pros: Right column
15	Used the function to Find and Replace **Mbps** with **MEGABITS PER SECOND**: 5x. If it is replaced in the equation, the function was not used If a space before or after **MEGABITS PER SECOND** is underlined, the function was not used (e.g. **MEGABITS PER SECOND**).
16	Upper case, bold, underline. Only awarded if the function was used (5 words found)
17	Page breaks, all pages
18	Pros sorted alphabetically
	Automatic paragraph numbering function not used and/or incorrect (Each level are marked according to the following)
	(a) Format correctly set up (Number format and numbers continue correctly, indentation
	(b) Correct text selected
19, 20	Level 1 correct according to a & b: 1)

QUESTION 7 (CONTINUED)

21, 22	Level 2 correct according to a & b: a)
23, 24	Level 3 correct according to a & b: i)
25, 26	Level 4 correct according to a & b: (1)
27	Paragraphs correctly indented: hanging indent. Also indent on the subparagraph following **ADSL VERSUS FIBRE**
28	Page 2 changed to landscape
29	Equation copied correctly, correct position
30	Endnote number (2) and text correct: Asymmetric Digital Subscriber Line
31	Line spacing, letter spaces, uc/lc
32	Hyphenation, justify, any other manipulation error

EXAMINATION NO (COMP NO) **10** QUESTION 8

✓**13.** *Page number, top centred, in line with Exam no and Q8*
✓**14.** *Page number bold*
✓**15.** *Start at 10*

HISTORY

Guiding of light by refraction, the principle that makes fibre optics possible, was first demonstrated by Daniel Colladon and Jacques Babinet in Paris in the early 1840s.

✓**16.** ***HEADING 1****: Rockwell 12, black, no spacing before and after*

RECORD SPEEDS

✓**17.** *Centre, bold. Applied to correct headings*

Achieving a high data rate and covering a long distance simultaneously are challenging, but possible with fibre connections.

2006: Nippon Telegraph and Telephone transferred 14 Tbits/s.
2009: Bell Labs in France transferred 15.5 Tbits/s over 7000 km fibre.
2010: Nippon Telegraph and Telephone transferred 69.1 Tbits/s over a single 240 km fibre.
2012: Nippon Telegraph and Telephone transferred 1 Pbits/s over a single 50 km fibre.

✓**18.** *Text sorted according to year*

USES

✓**19.** ***HEADING 2****: Rockwell 12 pt, black, no spacing before and after*
✓**20.** *Left, underlined, bold. Applied to correct headings*

Communication
Optical fibre is especially advantageous for long-distance communications.

Sensors
Optical fibres can be used as sensors to measure strain, temperature and pressure because of its small size.

Power transmission
Optical fibre can be used to transmit power using a photovoltaic cell to convert the light into electricity.

Other uses
They are used as light guides in medical situations. In some buildings, optical fibres route sunlight from the roof to other parts of the building. Optical fibre lamps are used for illumination in decorative applications.

✓**21.** *Page centred vertically*

✓**12.** *Page break*

MARKING GUIDELINE: QUESTION 10B
MANIPULATION: 30 MARKS

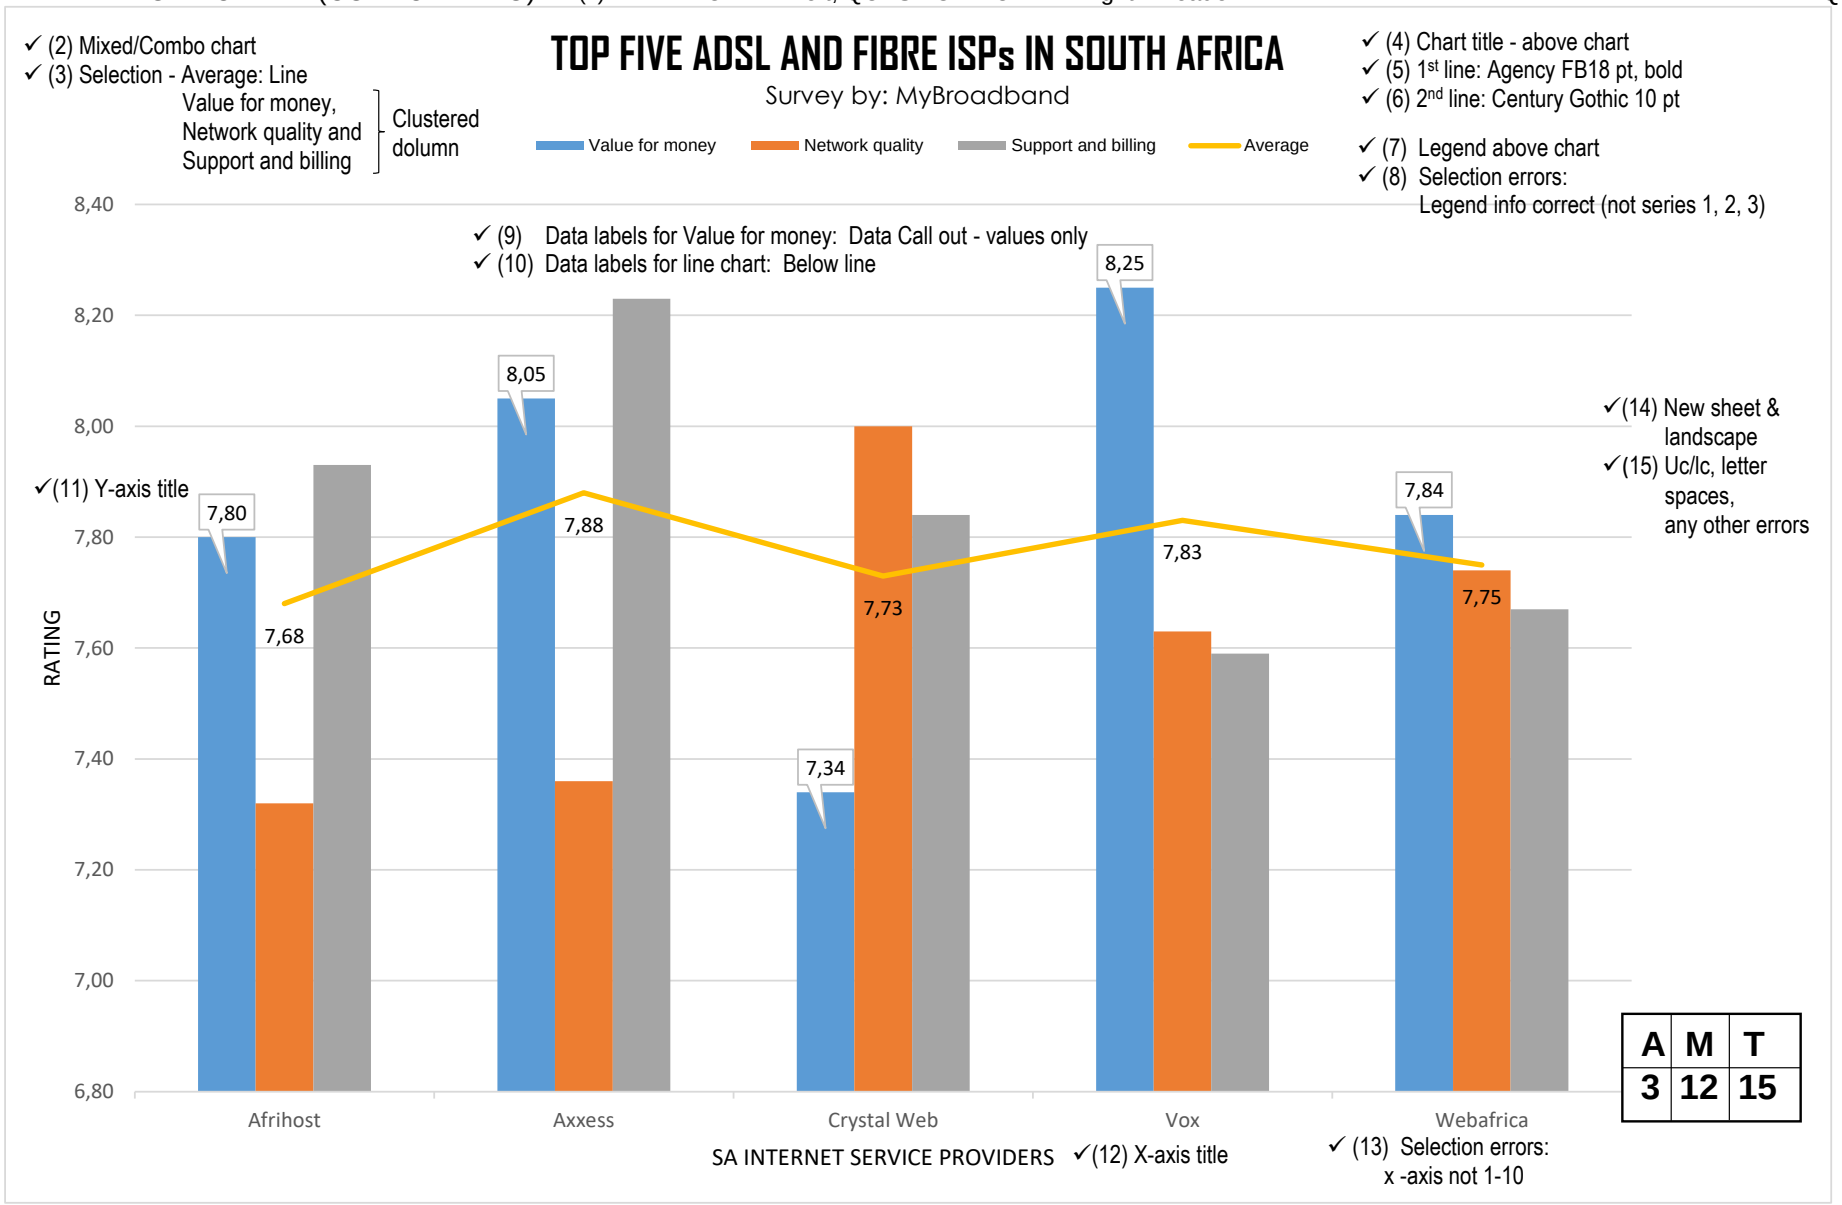

1	Change Question 10A to 10B
2	Print with row and column headings
3	Print with gridlines
4	Hide column A
5	Hide rows 1-4
6, 7, 8, 9	Correct formula PMT - 1 mark for each section
10	Correct formula
11, 12, 13, 14	Correct formula PV - 1 mark for each section
15, 16, 17, 18, 19	Correct formula RATE - 1 mark for each section
20, 21	Correct formula - 1 mark for each section
22	Correct formula
23	Correct formula
24, 25, 26, 27, 28	Correct formula PMT - 1 mark for each section
29	Correct formula
30	Formulae copied correctly
31	Column widths and row heights adjusted to fit full formula/function
32	Any other errors
33	One page, landscape
	No formulae displayed - loose marks 6-31 (26 marks)
	* If wrong function was chosen for any of the financial functions, 0 marks
