5.3 5.3.1 Stress is a dynamic condition in which an individual is confronted with an opportunity, constraint or demand related to what he or she desires and for which the outcome is perceived to be both uncertain and important. The body has psychological, emotional and physiological responses to the demand, which threatens the person's well-being.

5.3.2 Burnout is the prolonged exposure to stress. The individual will become exhausted, will start to suffer from depression and have a mental breakdown.

(2 × 3) (6)

5.4 It must be determined whether the training programme has achieved the training of skills, knowledge and attitudes that are to the benefit of the enterprise. An immediate objective of training for the enterprise is to quantify, in terms of money, what the contribution of the training department is to the enterprise. Management is often faced with smaller budgets, higher costs and fewer people to do the job and will require a high return on training investment. Line management often blame poor performance on a lack of training or ineffective training. (8)
