REPUBLIC OF SOUTH AFRICA

NATIONAL CERTIFICATE
INFORMATION PROCESSING N4
TIME: 3 HOURS
MARKS: 300

CANDIDATES ARE ALLOWED 30 MINUTES TO READ THE INSTRUCTIONS BEFORE THE EXAMINATION STARTS.

	TIME	MARKS
SECTION A: TYPING TECHNIQUE	**2 hours**	**200**
SECTION B: WORD PROCESSING	**1 hour**	**100**
TOTAL:	**3 hours**	**300**

READ THE FOLLOWING INSTRUCTIONS CAREFULLY BEFORE ANSWERING THE QUESTION PAPER. INVIGILATORS WILL EXPLAIN IF NECESSARY.

Copyright reserved

SECTION A: TYPING TECHNIQUE

1. Candidates who are NOT ready and on time for the TIMED ACCURACY TEST (QUESTION 1) will only be allowed to enter the examination venue after the expiration of the TEN MINUTES allowed for the test.

2. Candidates are allowed to read through the test THREE MINUTES before the commencement of the examination.

3. The timed accuracy test must be keyed in at the beginning of the examination.

4. After the expiration of the TEN MINUTES allowed for the test, your test will be collected and signed by the invigilator who will retain it until the completion of the examination session whereafter, in your presence, it will be put in your EXAMINATION FOLDER.

5. Answer ALL the questions.

6. Procedure for QUESTIONS 2, 3, 4 and 5: Key in, save and print.

7. Each answer must be printed on a separate A4 paper. Use only ONE side of the paper.

SECTION B: WORD PROCESSING

1. Answer ALL the questions.

2. Procedure for QUESTIONS 8A and 9A: Key in, save and print.

3. Retrieve, copy and process according to the instructions in part B of each question. Print and hand in part A as well as part B.

4. Each answer must be printed on a separate A4 paper. Use only ONE side of the paper.

Copyright reserved

GENERAL

1. A computer ruler and ASCII codes may be used.

2. NO notes or any nonpermissible material may be hidden in or transcribed into these articles.

3. Use only COURIER NEW 12 pt except if otherwise indicated in the question paper.

4. Save your work at regular intervals to prevent loss of keyed-in data during a power failure. Only the duration of the power failure will be allowed additionally. NO extra time will be allowed for loss of work.

5. In the event of a computer or printer defect the invigilator will make the necessary arrangements for you to continue with the examination and the actual time lost will be allowed additionally.

6. Key in the QUESTION NUMBER as well as your EXAMINATION NUMBER at each question. NO questions without EXAMINATION NUMBERS will be marked.

7. At the end of the examination session, hand in the following:

    7.1 EXAMINATION FOLDER with PRINTOUTS to be marked in the same order as the questions in the question paper.

    7.2 The compact disk/memory stick on which your work was saved, properly marked with your EXAMINATION NUMBER. If work is saved on the hard drive/network, the invigilator(s) must copy the work to a compact disk/memory stick and then it must be deleted immediately from the hard drive/network. Students' answers must be kept for at least 6 MONTHS.

    7.3 ALL other PRINTOUTS. NO PRINTOUTS may be taken out of the examination room or put into bins.

8. Any attempt to obtain information or to give information to another candidate is a violation of the examination rules and will be regarded in a serious light. If you are found guilty of such a violation, steps will be taken against you.

1. The following timed accuracy test must be keyed in ONCE only.
2. The passage allows for speeds of 35 and 40 words per minute.
3. Key in your EXAMINATION NUMBER (left), the QUESTION NUMBER and your STATION/COMPUTER NUMBER (right) as a header.
4. Save the document as Q1 and print it.
5. Your test must be collected and signed by the invigilator at the BEGINNING of the EXAMINATION. ALL pages need to be signed.

The quality of a stream or river is often a good indication of the way of life within a community through which it flows. It is an indicator of the socio-economic conditions and environmental awareness and attitude of its users. Everything that happens in a catchment area is reflected in the quality of the water that flows through it because the results of human activity and lifestyle ultimately end up in rivers through runoff.

Healthy streams, wetlands and rivers support a great variety of water life. Rain water and tumbling mountain streams contain high levels of oxygen. Much of the oxygen comes from the atmosphere through rain, tumbling water in fast-flowing streams and photosynthesis. Nutrient substances are washed into the system providing important growth chemicals and sources of food.

Water plants in turn photosynthesise and provide life-supporting oxygen and other food sources for water organisms that interact in a

QUESTION 1 (CONTINUED)

complex web of life. All life in the water is dependent on the interaction within the river itself and in the surrounding catchment.

These processes can either maintain a healthy ecosystem or disrupt ecological processes and degrade the water supply. Rivers and streams owe their existence to the nature of catchments and the relationship between rainfall and evaporation. Rivers are open systems where the exchange of material and energy within the environment occurs all the time. It is difficult to treat rivers as ecosystems because they are important pathways for the flow of energy and the circulation of nutrients across the boundaries of habitats.

Changes in water quality occur naturally along the length of a river. However, these changes may be significantly influenced by human activities. Industries, agriculture and urban settlements produce nutrient concentrates and toxic substances which can affect water quality. **35 wpm**

Water quality is also defined as water which is safe, drinkable and appealing to all life on earth. It should contain no chemical or **40 wpm**

ʌ What is water pollution? Arial 16 pt, uc, bold, u/line
‡ uc
The saying goes that water is life which is indeed true. With about seventy percent of earth being covered by water, in figures it is undeniably one of our biggest resources of water.
‡
ʌ [The contamination of water bodies simply means water pollution. NP ital
[Pollution of water occurs when substances that affect NP the water negatively are discharged into it.
‡ trs
Water pollution is an problem appalling powerful enough to lead the world on a path of destruction. [Water is a good NP solvent enabling most pollutants to dissolve in it easily thus contaminating it. [According to a report in *The* NP del in words *Economist* ~~(dated 2008)~~ over 1000 children die each day of diarrhoeal sickness in India and the numbers have increased alarmingly in the last five years. ʌ Let us now study the ital causes of water pollution. in figures

---------- Page break ----------

Candidate:
1. Change ALL underlined main paragraph headings to capital letters.
2. Paragraphs must be inserted in correct numerical order and indented.
3. Insert page numbers top centre (no number on first page).

[2. **Sewage and waste water:** The sewage and waste water that NP is produced by each household is chemically treated and released into the sea as fresh water. [8. **Leakage from sewer lines:** NP A small leakage from sewer lines can contaminate the underground water and make it unfit for humans to drink.

Copyright reserved

QUESTION 6B (CONTINUED)

sp
[5. **Acidental oil leakage**: Oil spills pose a huge concern NP
as large amounts of oil enter the sea. Oil does not mix with
water. This causes huge problems for local marine life such as
fish, birds and sea otters.

~~Pollution~~ stet
[3. **~~Mining~~ activities**: In mining rock is crushed to NP
extract underground coal and other minerals.

[7. **Chemical fertilisers and pesticides**: Chemical NP
fertilisers and pesticides are used by farmers to protect crops
from insects and bacteria. ʌ They are useful for the plants' growth. ital

1. **Industrial waste**: Industries produce huge amounts of
waste that contains toxic chemicals and pollutants which can
cause air pollution and damage to mankind and the environment.

[12. **Leakage from landfills**: Landfills are nothing but NP
huge piles of garbage that produce awful smells and can be seen
across the city.

[4. **Marine dumping**: The garbage produce by each household NP
in the form of paper, aluminium, rubber, glass, plastic and food
are deposited into the sea in some countries.

[6. **Burning of fossil fuels**: When burnt fossil fuels NP
like coal and oil emit substantial amounts of ash into the
atmosphere.

[9. **Global warming**: The increase in the temperature of NP
the earth due to the greenhouse effect results in global
warming.

[10. **Radioactive waste**: Nuclear energy is produced NP
using nuclear fission ~~or fusion~~. del

[11. **Urban development**: As the population grows so does NP
the demand for housing, food and clothes.

bold
ʌ[13. **Animal waste**: The waste produce by animals is washed away into the NP
rivers when it rains.

Find water and replace with water in capital letters and italics.
