Poverty is about not having enough money to meet basic needs including food, clothing and shelter. However, poverty is more, much more than just not having enough money.

The World Bank Organisation describes poverty in this way: 'Poverty is hunger. Poverty is lack of shelter. Poverty is being sick and not being able to see a doctor. Poverty is not having access to school and not knowing how to read.

Poverty is not having a job; it is fear for the future, living one day at a time. Poverty has many faces, changing from place to place and across time, and has been described in many ways.

Most often, poverty is a situation from which people want to escape. So poverty is a call to action - for the poor and the wealthy alike - a call to change the world so that many more may have enough to

eat, adequate shelter, access to education and health, protection from violence, and a voice in what happens in their communities.'

In addition to a lack of money, poverty is about not being able to participate in recreational activities; not being able to send children on a day trip with their schoolmates or to a birthday party; not being able to pay for medication for an illness.

These are all costs of being poor. Those people who are barely able to pay for food and shelter simply can't consider these other expenses. When people are excluded within a society, when they are not well educated and when they have a higher incidence of illness, there are negative consequences for society.

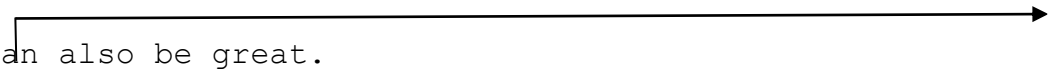

We all pay the price for poverty. The increased cost on the health system, the justice system and other systems that provide support to those living in poverty has an impact on our economy.

While much progress has been made in measuring and analysing poverty, the World Bank Organisation is doing more work to identify indicators for the other dimensions of poverty. This work includes identifying social indicators to track education, health, access to services, vulnerability, and social exclusion.

QUESTION 1 (CONTINUED)

There is no one cause of poverty, and the results are different in every case. Poverty varies considerably depending on the situation. The differences between rich and poor within the borders of a country can also be great.

Despite the many definitions, one thing is certain: poverty is a complex societal issue. No matter how poverty is defined, it can be agreed that it is an issue that requires everyone's attention. It is important that all members
