HEALTH FACTS

Cholesterol is a structural component of cell membranes. Cholesterol is necessary for the production of bile, a fluid made by the liver that aids in the digestion of fat in the intestine. Cholesterol is used to make vitamin D and certain hormones, like oestrogen and testosterone.

Cholesterol is found in all cells of the body. It is a waxy, fat-like substance produced primarily by the liver in both humans and animals.

Cholesterol in food is referred to as 'dietary cholesterol' and is found only in animal products.

Good vs. bad cholesterol

✓21. Underlined

Low-density lipoprotein (LDL) cholesterol is often referred to as 'bad' cholesterol. Higher levels of LDL cholesterol in the blood can lead to a harmful build-up of cholesterol in blood vessels.

✓21. Underlined

High-density lipoprotein (HDL) cholesterol is often referred to as 'good' cholesterol.

Higher levels of HDL cholesterol in the blood can help prevent cholesterol build up in blood vessels, decreasing your risk of developing cardiovascular disease.

✓25. No missing text
✓26. Line spacing
✓27. Uc/lc
✓28. Print: 1 A4 page
✓29. Any other error, letter spaces, etc.

Dietary cholesterol is found in animal products, including:

- Beef, chicken and pork fat
- Cream and milk (whole and 2% milk)
- Dairy products
- Egg yolks
- Meats and poultry
- Processed meat and poultry products
- Shellfish (such as lobster and shrimp)

✓22. Bullets
✓23. Sorted, A-Z
✓24. 1.5 line spacing

Steps to reduce cholesterol in your diet:

Try fish and plant sources in place of some meats and poultry.
Choose lean cuts of meats and poultry.
Substitute regular/full-fat (whole) dairy products for fat-free (skim) or low-fat (1%) dairy products.
Cook and bake with liquid oils (like canola or olive oil) instead of solid fats (like butter, lard or shortening).
Opt for foods that are naturally low in cholesterol and saturated fat, such as beans and peas, fruits, vegetables and whole grains.

HEALTHY LIVING:

✓ ***4.*** *New paragraphs*

✓ ***5.*** *Bold, 26 pt & centre*

8 STEPS TO TAKE TODAY

HEALTHY LIVING STARTS RIGHT NOW.

EXPERTS TELL YOU HOW.

‡

1. HEALTHY LIVING STEP 1: TAKE STOCK

1.1. Get a handle on your **HEALTH** status.

1.1.1. Make appointments with your doctor and dentist.

1.1.2. Get your length and weight to check your BMI.

1.1.3. Assess your physical activities.
1.1.3.1. How much physical activity do you get in a typical week?
1.1.3.2. How intense is that activity?
1.1.3.3. How much variety do you get in your activity, and how much do you enjoy it?

1.1.4. Keep a food diary.

1.1.5. Check your mood and energy.

1.1.6. Consider your social network and connections.
1.1.6.1. How strong are your connections with family and friends?
1.1.6.2. Are you plugged in with social or spiritual groups that enrich your life?

If you're not thrilled with the answers to some of these questions, remember that the point is to figure out where you are today so you can set your healthy living goals. It's not about being 'good' or 'bad,' 'right' or 'wrong.'

3. HEALTHY LIVING STEP 3: MOVE MORE

3.1. Increase physical activity.
3.1.1. Make it fun.
3.1.2. Keep track of it.
3.1.3. Set a weekly goal for activity.
3.1.4. Work activity into your day.

4. HEALTHY LIVING STEP 4: UPGRADE YOUR DIET

4.1. Here are some pointers.
4.1.1. Replace 'I should' with 'I choose.'
4.1.2. Skip the guilt.
4.1.3. Choose to plan.
4.1.4. Slow down and savour your food.
4.1.5. Shoot for five to nine daily servings of varied fruits and vegetables.
